

## Homeware - Asha coloured bone range

 Fair Trade  
Coloured Bone

Handmade by **Asha, Aspiration** and **Noah's Ark** in **India**.

These products are made in an area called Sarai Tarin, which has a 100-year tradition of working bone.

The bones are a bi-product of the meat industry. They are dyed and the colour then sealed with wax or lacquer. The pieces are fitted to the shape of the item, brass fittings are added and then the whole item is polished.
