

Animal pencil cases

Following on from our success with the animal bags and the aprons, we are now introducing pencil cases in the same selected designs.

The natural world still faces many threats, and we hope that as we expand the 'Save our Wild World' range we can raise even more awareness of some of the most endangered species around the world.

Alongside the bags and aprons, these too have the corresponding label with insight into each animal. The information includes the main threats that the species face and why it is important that we take action to protect them. Our customers have said how much they appreciate these tags as a way of informing customers about these issues.

The screen printed technique is used by a specialist Fair Trade producer group in India. By adding new items to this range, we are providing more work for our producers so buying these beautiful screen printed products promotes Fair Trade and provides a living for artisans in India too!

Bee and butterfly houses

We all know that the wild world is under threat. One way we can all help is to provide easy homes for birds, bees and other insects like butterflies.

These great combination 'hotels' are made in a small workshop in Bali using local bamboo and other sustainable materials.

The bee houses here are designed to provide nest cells for solitary bees of which there are 240 species in the UK. Species such as the red mason bees and leafcutter bees nest in tubes or tunnels. You can encourage these busy pollinators by providing artificial nest sites such as those we are selling here. Bee houses must be positioned in full sun, facing south or east, and be at least a metre off the ground.

Ayu (2nd from right in picture), who set up the workshop in which these bee houses were made, started her business making bamboo products in 2007. Now she employs 4 women and 2 men, using simple tools, sustainable materials, and assembling by hand. Last year our artisan support grant supplied her with scroll, cut off, jig, table and circular saws; cordless and bench drills; and other tools to help her develop her capacity. Keep up the good work Ayu, customers, please keep supporting her and her artisans!

Hand-carved painted wooden birds

Hand-carved using sustainable albesia wood in Bali, we really like this new range of British birds. They're the most realistic ones we've ever seen from artisans from overseas, who've never seen them in person. A fantastic gift and in any house with kids, a way of encouraging them to recognise and appreciate our wildlife.
