## Recycled Glassware

Crisil is our first supplier from Bolivia. Our first container of this high quality glassware almost sold out as soon as it arrived. A small, family-run business, Crisil provides an income for over 500 families. It's a great, eco product, made from 100% recycled glass. The glass is broken up, washed and melted before being mouth-blown and shaped into glasses, jugs and other products.

All products are made to a very high standard and are dishwasher safe.

## Bestselling range!

A recent report showed that the top supermarkets in the UK sold 2.5 BILLION disposable water bottles last year – 37 for each member of the population. What a waste! They're the most common form of litter on our coastline, and even if we recycle them it doesn't guarantee that they won't end up in our oceans, a major pollutant and a hazard to wildlife.

## Benefits are:

- very high quality
- fair trade
- 99.7% pure copper
- sustainable material
- leakproof

## Copper water bottles

**COP02**
