Papier mache has a rich history tracing back to 200 AD during the Han dynasty. In the 15th century, Sultan Zain-ul-Abidin brought it to Kashmir, where it became a popular local craft. It's a mixture of paper pulp, flour and glue, soaked in water and then dried. Finally our artisans paint their stunning designs, a really difficult skill. Recycling waste paper into these beautiful, exotic and colourful products is an amazing transformation which has to be seen to be believed. Today this craft is a source of livelihood for thousands of artisans in India.
