Rainbow macrame
hanging 27cm

We'd like this catalogue to be a symbol of HOPE. Some of our suppliers are smiling, are you? Join us in our mission to create a fairer, sustainable world and you soon will be!

All products are now delivered from the producer to your doorstep- carbon-free!

Hello everyone

Welcome to a new and somewhat different catalogue! We start with rainbows – a symbol of hope, dreams, fulfilment and happiness – which we all need after the Covid crisis! This year, in addition to gifts, homeware etc, we introduce some new sections, notably It's up to us! – how can we help tackle climate change?; and Save our wildlife! Animals are an integral part of our beautiful planet. Predators keep herbivores in check; bees pollinate plants; birds disperse seeds, and a threat to any part of the food chain is ultimately a threat to us. Sales of wildlife products are booming; we recommend these pages.

We are one of the fastest growing suppliers in the UK. Why? Because we care! Our mission statement is to tackle the climate crisis and create a fairer, more sustainable world. Weather patterns are changing, and natural disasters are on the up. We face the possibility of the biggest migrations in human history, from lands which are no longer habitable... and a new 'mass extinction' of wildlife not seen in millions of years. We don't want to be the voice of doom, however – we still have time to prevent this catastrophe. But we need to act now! As businesses, we can play a big part in this. Demand for products which will help slow global warming is increasing rapidly, and the COP26 conference in Glasgow will add further impetus. What type of products are we selling? Are raw materials sustainable? Are fossil fuels a significant factor in production, packaging and transportation? Are they plastic-free?

Recycled, sustainable and Fair Trade products are the basis of this catalogue. And this year, we tackle a dilemma faced by all importers. From January 2021, the shipping of all our products, from the producer overseas to you as a customer, will be carbon-neutral, resulting in CO2 emissions of ZERO. This will be an added selling point for you; you'll be able to offer your customers genuine carbon-free products, and you'll be showing them, by buying our products, that you too are concerned about climate change and are doing something about it. Read more on page 7.

There's a lot of 'greenspeak' around as businesses jump on the bandwagon, but we really mean what we say! We have some fantastic new ranges in this catalogue and we'd love you to join us as we try to protect our planet.

Jeremy Piercy

Founder and MD, Shared Earth

A rainbow a day keeps the blues away!

This cheerful rainbow ceramics range is fired and hand-painted in Lampang, Thailand. In terms of hope and putting a smile on your face, as a retailer you can hardly go wrong – it's been a best-selling range for us for years. See also pages 30-32.

Dreamcatchers

These colourful chakra dreamcatchers are made in Bali, in a small village in the hills. And while we're talking about hope, how about these girls? Bali is a beautiful island, but it struggles with waste, especially single-use plastic bags and wrappers. Our dreamcatcher supplier, Wayan, has set up a local group called Clean and Green, and every Sunday, with the help of a few adults, this group of dedicated youngsters trawl the lanes and verges of their village cleaning up the rubbish they find. Most of it is plastic, which is swept down the hillsides by rainstorms, clogging up drains, streams, roads and rivers on its ugly way to the sea.
