

Want to fight climate change? Swap your car for a bike!

Transport is the UK's biggest emitter of greenhouse gases. Emissions from energy have dropped by 60% since 1990, but emissions from transport have barely changed at all. We need to change our ways – and travelling by bike, whilst not practical for all, is a great alternative! By cycling, you can help to reduce global warming, get fit and save money into the bargain!

These bikes are all handmade in Nairobi's slums where they provide work for families who would otherwise have no work. More designs (available on our website).

M001
bicycle saddle
cover asst cols

NEW

These great saddle covers, made in Vietnam from recycled cement sacks, are excellent quality, and very useful for a cyclist in rainy Britain. Tried, tested and highly recommended.

Bike chain, nuts and bolts

These products are made in a Fair Trade workshop in Moradabad, Northern India.

The recycled bicycle chains come from two sources: 60% are collected from bicycle repair centres and 40% are cut-offs/loose waste from factories and big shops.

Such quirky items always catch customers' attention and are excellent gifts for men and all passionate cyclists!

Recycled brass chimes

Waste brass is melted down and poured into moulds to make the bells. Making brass from new zinc and copper is uneconomical, so recycling creates a sustainable industry. Melting down a variety of brass alloys creates a rich array of warm golden hues.

Recycled collectables from Bezalila, Madagascar

Bezaila was formed in 1994 as a co-operative for workshops making Malagasy handicrafts.

One of our most popular ranges, these models are all made from recycled tin cans.

Bezaila has 18 workshops, providing Fair Trade employment to formerly impoverished artisans in crafts such as weaving, woodwork, bone carving, and modelling recycled tin cans, called "Kapoaka" in Madagascar.

Recycled bags Handmade in India

Our new supplier Conserve, based in New Delhi, India, is totally dedicated to eco values and in particular reducing the amount of plastic that litters India, blocks rivers and eventually ends up in the ocean. They're a true pioneer in this field, using ever-innovative techniques, and in 15 years, they have trained over 1,200 individuals in how to make upcycled products, who now do so independently.

No fears of competition here! It's the reason for their business, they want to encourage as many people as possible to re-use and upcycle. They are also a Fair Trade livelihood system for Delhi's rag-pickers, combining social and eco values, a great example to others. We hope you will support them by ordering these bags.
